The webcast of the Morgan Stanley fireside chat will be accessible on the [investor section](#) of [Attovia's website](#). A replay of the webcast will be available for approximately 90 days following the conference.

About Attovia Therapeutics, Inc.

Attovia™ is a clinical-stage biopharmaceutical company developing next-generation biotherapeutics for immune-mediated diseases with high unmet need. All of its product candidates have been internally discovered using its ATTOBODY™ biparatopic biologics platform. Attovia's ATTOBODY platform uses an evolution-driven, high-throughput process that allows for rapid discovery and creation of a high diversity of potential product candidates.

Attovia's lead programs include ATTO-1310, an anti-IL-31 therapeutic in clinical development for chronic pruritic diseases; ATTO-2306, a bispecific antibody targeting IL-31 and IL-13 in IND-enabling studies for atopic dermatitis and other immune-mediated skin diseases; and ATTO-1091, a trispecific antibody targeting TL1A, IL-23p19, and integrin $\alpha 4\beta 7$ in IND-enabling studies for inflammatory bowel disease. Attovia's other programs include highly innovative conditional 'AND' gated bispecific immune cell survival blockers and multispecifics.
